Printing date 03.07.2024

Version number 4 (replaces version 3)

Revision: 03.07.2024

SECTION 1: Identification of the substance/mixture and of the company/undertaking

· 1.1 Product identifier

· Trade name: PBS 1X Powder Sachet-Pack 10

- Article number: 20-7460-01
- · Registration number Mixture
- · 1.2 Relevant identified uses of the substance or mixture and uses advised against
- · Product category PC21 Laboratory chemicals
- · Application of the substance / the mixture Laboratory chemicals
- · Uses advised against Any use not specified above.
- · 1.3 Details of the supplier of the safety data sheet
- **Supplier:** Severn Biotech Ltd. Unit 2, Park Lane,

Kidderminster, Worcestershire. DY11 6TJ UK Tel: 0044 1562 825286 Fax: 0044 1562 825284 email: info@severnbiotech.com

· Further information obtainable from: Product safety department.

· 1.4 Emergency telephone number:

Members of the public seeking specific information on poisons should contact: In England and Wales: NHS 111 - dial 111 In Scotland: NHS 24 - dial 111

In Scotland: INHS 24 - dial 111

SECTION 2: Hazards identification

· 2.1 Classification of the substance or mixture

• Classification according to Regulation (EC) No 1272/2008 The product is not classified, according to the GB CLP regulation.

- · 2.2 Label elements
- · Labelling according to Regulation (EC) No 1272/2008 Void
- · Hazard pictograms Void
- · Signal word Void
- · Hazard statements Void
- · Additional information:
- EUH210 Safety data sheet available on request.
- · 2.3 Other hazards
- · Results of PBT and vPvB assessment
- · **PBT:** Not applicable.
- · vPvB: Not applicable.

SECTION 3: Composition/information on ingredients

· 3.2 Mixtures

×

· Description: Mixture of substances listed below with nonhazardous additions.

· Dangerous components:

8		
CAS: 7647-14-5	Sodium chloride	50 - 100%
EINECS: 231-598-3	substance with a Community workplace exposure limit	
Reg.nr.: 01-2119494219-28-XXXX		
-		
	((Cont.d. on page 2)

GB

Printing date 03.07.2024

Version number 4 (replaces version 3)

Revision: 03.07.2024

Trade name: PBS 1X Powder Sachet-Pack 10

• Additional information: For the wording of the listed hazard phrases refer to section 16.

(Contd. of page 1)

SECTION 4: First aid measures

- · 4.1 Description of first aid measures
- · General information: Immediately remove any clothing soiled by the product.
- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact:
- Immediately rinse with water.
- If skin irritation continues, consult a doctor.
- · After eye contact:
- Check for and remove any contact lenses.

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

- After swallowing:
- Rinse out mouth and then drink plenty of water.

Do not induce vomiting; call for medical help immediately.

- Information for doctor: Treat symptomatically and supportively.
- 4.2 Most important symptoms and effects, both acute and delayed
- No further relevant information available.
- **4.3 Indication of any immediate medical attention and special treatment needed** No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
- · Suitable extinguishing agents:

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

Use fire extinguishing methods suitable to surrounding conditions.

- \cdot For safety reasons unsuitable extinguishing agents: Water with full jet
- · 5.2 Special hazards arising from the substance or mixture
- In case of fire, the following can be released:

Chlorine compounds

Phosphorous oxides

Toxic metal oxide smoke

- · 5.3 Advice for firefighters
- Protective equipment:

Do not inhale explosion gases or combustion gases.

Wear self-contained respiratory protective device.

Wear fully protective suit.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation Avoid formation of dust.
 6.2 Environmental precautions: Do not allow to penetrate the ground/soil. Do not allow to enter sewers/ surface or ground water.
 6.3 Methods and material for containment and cleaning up: Pick up mechanically. Send for recovery or disposal in suitable receptacles.
 6.4 Reference to other sections
- See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

(Contd. on page 3)

Printing date 03.07.2024

Version number 4 (replaces version 3)

Revision: 03.07.2024

Trade name: PBS 1X Powder Sachet-Pack 10

See Section 13 for disposal information.

(Contd. of page 2)

SECTION 7: Handling and storage

- · 7.1 Precautions for safe handling
- Prevent formation of dust.

Ensure good ventilation/exhaustion at the workplace.

- · Information about fire and explosion protection: No special measures required.
- · 7.2 Conditions for safe storage, including any incompatibilities
- · Storage:
- Requirements to be met by storerooms and receptacles: Prevent any seepage into the ground.
- Information about storage in one common storage facility: Store away from oxidising agents.
- Further information about storage conditions: Store in cool, dry conditions in well sealed receptacles.
- · Storage class: 11
- 7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

	ol parameters

Version number 4 (replaces version 3)

Revision: 03.07.2024

Trade name: PBS 1X Powder Sachet-Pack 10

Sewage Treatment Plant [50 mg/L] • Additional information: The lists valid during the making were used as basis. • S2 Exposure controls • Appropriate engineering controls No further data; see section 7. • Individual prodection measures: The usual precationary measures are to be adhered to when handling chemicals. Keep away from foodstaffs, beverages and feed. Avoid contact with the eyes and skin. Do not et ad, fink, smoke or solf while working. Wash hands before breaks and at the end of work. Do not text, fink, smoke or solf while working. Wow Protection Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the gloves The selection of the subtance/ the preparation. Selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the approarbit the glove material can not be calculated in advance and has therefore to be checked prior to the appropriate government standards such as NIOSH (US) or EN 166. Use equipment for gree protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166		(Contd. of page 3)				
 8.2 Exposure controls Appropriate engineering controls No further data; see section 7. Individual protection measures, such as personal protective equipment General protective and hygienic measures: The usual protection and hygienic measures: No not eat, drink, smoke or sniff while working. Wash hands before breaks and at the end of work. Do not eat, drink, smoke or sniff while working. Protection: Use suitable respiratory protective device in case of insufficient ventilation. Hand protection: Use suitable respiratory protective device in case of insufficient ventilation. Hand protection: Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Excriton time of glove material can not be calculated in advance and has therefore to be checked prior to the application. Sectrot 92 Physical and chemical properties encertain time of glove material can not be calculated in advance and has therefore to be checked prior to the appropriate government standards such as NIOSH (US) or EN 166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Body protection: Setter beack through time has to be found out by the		ring the making ware used as basis				
 Appropriate engineering controls No further data; see section 7. Individual protection measures, such as personal protective equipment General protective and hygienic measures: The usual precautionary measures are to be adhered to when handling chemicals. Keep away from foodstuffs, beverages and feed. Avoid contact with the eyes and skin. Do not eat, drink, smoke or smiff while working. Wash hands before breaks and at the end of work. Do not eat, drink, smoke or smiff while working. Wash hands before breaks and at the end of work. Do not eat, drink, smoke or smiff while working. Wash hands before breaks and at the end of work. Bo not breathe dust. Respiratory protection: Use suitable respiratory protective device in case of insufficient ventilation. Hand protection Protective gloves. Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product the substance/ the preparation. Selection of the glove material an on ble calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the application. Penetration time of glove material an othe set befound out by the manufacturer of the protective gloves and has to be observed. Eyeface protection Safety glasses with side-shields conforming to EN166. Use equipment for e		ting the making were used as basis.				
 General protective and hygienic measures: The usual protective and hygienic measures are to be aftered to when handling chemicals. Keep away from foodstuffs, beverages and feed. Avoid contact with the eyes and skin. Do not ext, drink, smoke or smift while working. Wash hands before breaks and at the end of work. Do not beta, drink, smoke or smift while working. Respiratory protection: Use suitable respiratory protective device in case of insufficient ventilation. Hand protection Protective gloves. Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves The selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Material of gloves material an not be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material can not be calculated in advance and has therefore to be checked prior to the application. Peretration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Eye/face protection Safety glaves with side-shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Body protection: Safety glaves while shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US)	· Appropriate engineering controls No furt					
Keep away from foodsinffs, beverages and feed. Avoid contact with the eyes and skin. Do not eat, drink, smoke or sniff while working. Wash hands before breaks and at the end of work. Do not break and at the end of work. Hand protection Image: the eyes and skin. Protective gloves. Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation The selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. • Perface protection Image: Stafty glasses with side-shields conforming to EN166. Use quipment for eye protection tested and approved under appropriate government standards when a such as NIOSH (US) or EN 166(EU). • Body protection: Stafty glasses with side-shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). • Body protection: <tr< th=""><th>· General protective and hygienic measure</th><th>s:</th></tr<>	· General protective and hygienic measure	s:				
Avoid contact with the eyes and skin. Do not eat, drink, smoke or sniff while working. Wash hands before breaks and at the end of work. Do not breathe dust Respiratory protection: Use suitable respiratory protective device in case of insufficient ventilation. Hand protection Work is gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU). The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Decomposition temperature:	Not determined.
pH at 20 °C	7 (5%)
Viscosity:	
Kinematic viscosity	Not applicable.
Dynamic:	Not applicable.
Solubility	
water:	Soluble.
Partition coefficient n-octanol/water (log valu	ue) Not determined.
Vapour pressure:	Not applicable.
Density and/or relative density	11
Density at 20 °C:	2.05 g/cm ³
Relative density	Not determined.
Vapour density	Not applicable.
× v	upphouoio.
9.2 Other information	
Appearance:	
Form:	Crystalline powder
Important information on protection of healt	th and
environment, and on safety.	
Ignition temperature:	Product is not self-igniting.
Explosive properties:	Product does not present an explosion hazard.
Change in condition	
Evaporation rate	Not applicable.
Information with regard to physical hazard c	classes
Explosives	Void
Flammable gases	Void
Aerosols	Void
Oxidising gases	Void
Gases under pressure	Void
Flammable liquids	Void
Flammable solids	Void
Self-reactive substances and mixtures	Void
Pyrophoric liquids	Void
Pyrophoric solids	Void
Self-heating substances and mixtures	Void
Substances and mixtures, which emit flamma	
gases in contact with water	Void
Oxidising liquids	Void
	Void
Oxidising solids	Void
Organic peroxides	Void
Corrosive to metals Desensitised explosives	Void Void
LIACANCITICAN AVNIACIVAC	V ()1/1

SECTION 10: Stability and reactivity

- · 10.1 Reactivity No further relevant information available.
- · 10.2 Chemical stability

×

- \cdot Thermal decomposition / conditions to be avoided:
- No decomposition if used and stored according to specifications.
- 10.3 Possibility of hazardous reactions No dangerous reactions known.
- \cdot 10.4 Conditions to avoid No further relevant information available.
- \cdot 10.5 Incompatible materials: Strong oxidising agents.
- · 10.6 Hazardous decomposition products:
- Phosphorus oxides (e.g. P2O5) Chlorine compounds

(Contd. on page 6)

Toxic metal oxide smoke

SECTION 11: Toxicological information

- \cdot 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008
- · Acute toxicity Based on available data, the classification criteria are not met.
- · LD/LC50 values relevant for classification:
- 7647-14-5 Sodium chloride
- Oral LD50 > 2,000 mg/kg (rat)

7558-79-4 Disodium hydrogenorthophosphate

- Oral LD50 > 2,000 mg/kg (rat)
- Dermal LD50 > 2,000 mg/kg (rabbit)
- Skin corrosion/irritation Based on available data, the classification criteria are not met.
- · Serious eye damage/irritation Based on available data, the classification criteria are not met.
- · Respiratory or skin sensitisation Based on available data, the classification criteria are not met.
- · Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- \cdot Reproductive toxicity Based on available data, the classification criteria are not met.
- \cdot STOT-single exposure Based on available data, the classification criteria are not met.
- \cdot **STOT-repeated exposure** Based on available data, the classification criteria are not met.
- · Aspiration hazard Based on available data, the classification criteria are not met.
- \cdot 11.2 Information on other hazards

· Endocrine disrupting properties

None of the ingredients is listed.

SECTION 12: Ecological information

· 12.1 Toxicity

- · Aquatic toxicity:
- 7647-14-5 Sodium chloride

EC50 (96 h) > 4,000 mg/l (Bacteria)

5,840 mg/l (fsh)

7558-79-4 Disodium hydrogenorthophosphate

EC50 (96 h) > 100 mg/l (Bacteria)

- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential Product is not expected to bioaccumulate.
- 12.4 Mobility in soil No further relevant information available.
- · 12.5 Results of PBT and vPvB assessment
- **PBT:** Not applicable.
- **vPvB:** Not applicable.
- · 12.6 Endocrine disrupting properties
- The product does not contain substances with endocrine disrupting properties.
- · 12.7 Other adverse effects
- · Additional ecological information:
- · General notes:

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

(Contd. on page 7)

Printing date 03.07.2024

Version number 4 (replaces version 3)

Revision: 03.07.2024

Trade name: PBS 1X Powder Sachet-Pack 10

(Contd. of page 6)

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

- Recommended Hierarchy of Controls:
- Minimise waste;
- Reuse if not contaminated;
- Recycle, if possible; or
- Safe disposal (if all else fails).

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Contact waste processors for recycling information.

Used, degraded or contaminated product may be classified as hazardous waste. Anyone classifying hazardous waste and determining its fate must be qualified in accordance with state and international legislation.

· Uncleaned packaging:

· Recommendation:

Empty contaminated packagings thoroughly. They may be recycled after thorough and proper cleaning. Disposal must be made according to official regulations.

Containers, even those that are "empty," may contain residues that can develop flammable and/or hazardous vapours upon heating. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.

• Recommended cleansing agents: Water, if necessary together with cleansing agents.

SECTION 14: Transport information

· 14.1 UN number or ID number · ADR/RID/ADN, ADN, IMDG, IATA	Not applicable	
 · 14.2 UN proper shipping name · ADR/RID/ADN, ADN, IMDG, IATA 	Not applicable	
· 14.3 Transport hazard class(es)		
· ADR/RID/ADN, ADN, IMDG, IATA · Class	Not applicable	
· 14.4 Packing group · ADR/RID/ADN, IMDG, IATA	Not applicable	
 14.5 Environmental hazards: Marine pollutant: 	No	
· 14.6 Special precautions for user	Not applicable.	
• 14.7 Maritime transport in bulk according to IMO instruments Not applicable.		
· Transport/Additional information:	Not dangerous according to the above specifications.	
· UN "Model Regulation":	Not applicable	

SECTION 15: Regulatory information

 \cdot 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture \cdot Poisons Act

· Regulated explosives precursors

None of the ingredients is listed.

· Regulated poisons

None of the ingredients is listed.

(Contd. on page 8)

\cdot Reportable explosives precursors

None of the ingredients is listed.

\cdot Reportable poisons

None of the ingredients is listed.

· Directive 2012/18/EU

- Named dangerous substances ANNEX I None of the ingredients is listed.
- · 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

This Safety Data Sheet is in compliance with Regulation (EC) No 1907/2006, Article 31 as amended by Regulation (EU) 2020/878.

· Department issuing SDS: Product safety department.

· Abbreviations and acronyms:

ADR: Accord relatif au transport international des marchandises dangereuses par route (European Agreement Concerning the International Carriage of Dangerous Goods by Road)

IMDG: International Maritime Code for Dangerous Goods

IATA: International Air Transport Association

GHS: Globally Harmonised System of Classification and Labelling of Chemicals

EINECS: European Inventory of Existing Commercial Chemical Substances

ELINCS: European List of Notified Chemical Substances

CAS: Chemical Abstracts Service (division of the American Chemical Society) DNEL: Derived No-Effect Level (UK REACH)

PNEC: Predicted No-Effect Concentration (UK REACH)

LC50: Lethal concentration, 50 percent

LD50: Lethal dose, 50 percent

PBT: Persistent, Bioaccumulative and Toxic

vPvB: very Persistent and very Bioaccumulative
